The ice storm that hit Commerce on Friday, December 6, 2013 damaged and destroyed many trees in the City of Commerce and left a trail of limbs and branches in yards all over town. To help with the cleanup efforts, the City of Commerce Public Works Department will be providing a special pick up service to remove limbs and branches in residential areas.

Residents are asked to pile the limbs and branches curbside and crews will be picking it up as soon as they can. If it is possible, please help our crews by cutting the larger limbs and branches to no longer than five feet long.

The City is also asking that citizens be aware of individuals and or companies that you do not know, that want to remove tree limbs for a cost. We have not had any reports of these type occurrences, but we want citizens to be aware and only use individuals or companies that you are familiar with.

Questions or comments may be addressed by calling the Public Works Department at 903-886-1152.
